Access Control Manufacturers

Axxess 28 installs and supports access control systems from Bewator, Honeywell, PAC, Paxton and TSSI.

The system manufacturer that we propose to install depends on the customers exact requirements and budget for the system.

All these systems support SQL database technology as standard.

Battery Operated Access Control Systems

The Salto "virtual network (SVN) system allows stand-alone battery operated locks to read, receive and write information on the cards. As most User access related info is kept (encrypted) on the ID carriers, on line wall readers are able to update (and receive information from) the cards at any time everywhere in the building, while for the standard user the up-dater is just another wall reader.

Benefits:

- Controlling staff and contractors provides a safe and secure environment for your staff and visitors.
- Reduction of access control related management time, without the loss of functionality, flexibility, control and security.
- Low installation cost per door

Site Graphics

The access control systems from Honeywell, Bewator, PAC and Paxton support site graphics or site mapping as standard.

Site mapping will allow security to react to events quickly and with a map of the site popping up on the screen they will instantly know where the event has occurred.

- ✓ We provide a system that will be system will be designed, installed and supported by specialists.
- ✓ Our project and support costs offer the best value for money for the whole life costs of the systems, where you can be assured of getting high quality equipment together with a high quality installation and after sales support and we will be around in 10 years and more still supporting your systems.
- ✓ We provide a system that will work effectively for its design life - reducing the total cost to you and inconvenience to your staff from poorly designed or low cost, low value equipment. (Subject to annual maintenance)
- ✓ We can assure you that we will meet todays and future requirements regarding installation and support together with competitive pricing.
- ✓ Due to the modular nature of our installation your equipment would be constantly monitored in order that we are able to offer you suggestions how to keep your systems up to date.
- ✓ All access control systems that we install support SQL database technology as standard.
